

ABOUT US

Private Space Medical is a premier mental health clinic dedicated to treating mental health conditions in children and adults, including ADHD, depression, anxiety, emotional difficulties, OCD, early psychosis, PTSD, and insomnia. We also provide learning and educational assessments for children and teenagers, therapy for families and couples, as well as behavioural assessments and interventions across a wide range of age and severity profiles.

Our psychiatrists, psychologists, and therapists graduated from top Singapore and international universities, have years of experience working in renowned hospitals including SGH and KKH, and have received training and awards both locally and abroad.

At Private Space Medical, our mission is clear: to provide exceptional care within a safe and private environment, empowering clients on the path toward *Positive Change* and *Purposeful Lives*. Experience compassionate treatment, evidence-based therapies, and personalised care. Contact us for an appointment and start your journey toward mental well-being.
